

Learn stream trout fishing basics at Bass Pro Seminar

Jim Matthews, a well-known Southern California outdoor writer, will be conducting a stream trout fishing seminar beginning 10 a.m. Saturday, April 10, at Bass Pro Shops in Rancho Cucamonga. Held on the eve of the Sierra Nevada trout season opener, the session will give beginning and veteran anglers alike the information they need to catch both wild and stocked trout from moving waters.

“I learned how to fish for trout 50 years ago on small trout streams in the San Bernardino Mountains,” said Matthews. “The fishing techniques, baits, and approaches are completely different from what it takes to catch trout in lakes and ponds, and the simple truth is that most anglers today don’t know how to fish streams and

ivers. It’s not difficult, it’s just different. And in many ways, its easier to catch trout in moving water because you can tell with some certainty where the fish are holding and feeding.”

The seminar will cover gear basics, rigging, natural bait collection and use, reading the water, and important tips on stealth. Matthews will explain the differences between fishing for wild or native trout and planted hatchery fish.

Cost for the seminar is \$40 per person, with all members of the family in the same household included in that price. Kids are especially welcome.

Seating is limited so pre-registration is recommended. You use the form on the back of this flyer, or call Matthews’ office at 909-887-3444 with your credit card information.
