Quail Calls & Pricing

Jim Matthews Signature Calls are available in basic stick and chamber call designs for sportsmen who are interested in function over form. The heirloom calls are the top of the line, one-of-a-kind calls. All calls feature an easily-replaceable rubber band reed. There is a \$15 per-order shipping fee added to these prices.

Basic Custom Stick Calls

\$60

This is a basic call that will last a lifetime. It will work for valley, Gambel's, and scaled quail. Many hunters never feel the need for anything more. They are made in limited batches each year, announced on my social media sites (Facebook and Instagram) when completed, and only available until sold out.

Basic Custom Chamber Calls

\$75

This call has a sound chamber built into the call to give it more resonance and versatility. When blown from the opposite side, it is like a stick call. This gives the call two different voices. I jokingly call these "the perfect call." I try to always keep some in stock.

Heirloom Custom Calls

\$90

This is the everything-custom call. There is nothing basic about it. It has figured and/or richly colored wood and often have unique shapes, sizes, and features. They are truly one-of-a-kind calls that will last a lifetime. Options available are nearly endless. These are some popular options and how much they add to the cost of the custom call:

Leather Lanyard

plus \$20

Shotgun Shell Head

plus \$20

Field-Cut Wood, Wood Upgrade, or Laminates

plus \$20

Knot and/or Crack Fill (usually done with brass)

plus \$20

Quail Whistles

for Mountain Quail & Bobwhite Quail

Basic Custom Whistle Call **\$75**

This is a whistle call made for either bobwhite quail or mountain quail (specify) that will last a lifetime. The mountain quail call will also work for Mearn's quail. They are made from nice grade wood.

Heirloom Custom Whistle Call **\$90**

This is the heirloom version of the whistle call with unique details. It has higher grade wood, often with contrasting wood caps. Wood is often collected in the field (price upgrade), or it can be made with wood supplied by the customer. Available options with price upgrades are the same as for the for the chamber calls on the front page of this list.

The Legacy Line

Combination Quail Calls

These custom calls feature a rubber-band chamber call combined with a whistle call for situations where two species may be encountered on the same hunt. They are usually made with valley and mountain quail calls in the same piece, but I have made other combinations, including some three-way calls.

Custom Two-Way Call **\$190**

This is the legacy call of my line, and it is mostly made to order. I usually make a small handful each year for inventory, but they are usually sold the day they are posted on social media. Available options with price upgrades are the same as for the for the chamber calls on the front page of this list.
